SAMUEL SHOLADEMI

Data Analyst | Business Intelligence & Reporting

Lagos, NG | P: +234 7018276423 | samuelsholademi37@gmail.com | LinkedIn | GitHub | Portfolio

Data Analyst working in Power BI, SQL, Python (Pandas, NumPy), and Excel. Recent projects cover e-commerce profitability, returns, and fulfilment (5,873 orders, €640K net sales) and marketing channel and customer value analysis (2,200 customers). Also completed a PwC job simulation on customer satisfaction and HR data.

TECHNICAL SKILLS

Data Analysis: SQL, Python, Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis, Statistical Analysis
Business Intelligence: Power BI, DAX, Power Query, Dashboard Development, KPI Tracking, Data Modeling
Excel: PivotTables, VLOOKUP/XLOOKUP, Data Cleaning, DataVisualization
Analytics: Profitability Analysis, Customer Segmentation, Marketing Analytics, Campaign Analysis, Returns Analysis, Churn Analysis
Business Analysis: Stakeholder Reporting, KPI Definition, Business Insights and Recommendations.

PROJECTS

E-Commerce & Profitability Analytics GitHub Repo | Dashboard

- Built a 4-page Power BI dashboard (Executive Performance, Product & Customer, Returns & Operations, Inventory) on 5,873 orders and €640.42K in net sales, defining the business question, KPIs, and target stakeholders (finance, marketing, operations, inventory) for each page and documenting them in a report.
- Wrote the DAX measures for net sales, contribution margin, AOV, return rate, on-time delivery rate, and lost sales value used across the four pages.
- Found that Beauty earns a 46.3% margin while Electronics earns 2.8%, and that the Clearance 35% campaign lost €2.8K on €22.5K of net sales.
- Traced €36.7K in lost sales to 498 unfulfilled units out of 11,449 ordered, 51% of it in Electronics (€18.7K) and the highest unit count in Western Europe (155).

Marketing & Customer Acquisition Analytics GitHub Repo | Dashboard

- Built a 3-page Power BI dashboard (Acquisition Overview, Campaign Performance, Customer Value) on 2,200 customers, 5,873 orders, and €640.42K in net sales, and wrote a report that maps each page to its stakeholders (CMO, finance, CRM) with the business questions, scenarios, and actions each can take.
- Compared the six channels on marketing cost, contribution margin, and revenue per customer, where Paid Social took 52% of the €29.9K spend for €17.8K margin and Organic Search returned €33.2K on about €1.5K.
- Ranked the promotional campaigns by contribution margin, with Bundle & Save at 28.5%, Loyalty 10% at 27.1%, and Clearance 35% at a €2.8K loss.
- Checked customer quality by channel and found VIPs made up 14.6% of Email/CRM customers against 1.5% for Paid Social, which also brought in the most deal seekers (89).

EXPERIENCE

PwC — Job Simulation (Forage Platform) Jun 2024 – Sep 2024

- Built a Power BI call center dashboard with agent, topic, and date filters that tracked an 81.74% answer rate, a 73.73% resolution rate, a 67.91-second average answer speed, and a 3.46 out of 5 customer satisfaction score for January 2021.
- Built a two-page Power BI churn dashboard and customer risk analysis on 7,043 PhoneNow customers, which showed a 26.54% churn rate with 1,869 customers at risk and $139.13K in monthly charges tied to them.
- Found that Fiber optic customers churned at 41.89% against 18.96% for DSL and that 89% of churned customers were on month-to-month contracts, then proposed retention KPIs such as 5% growth in 1 and 2 year contracts and 0.5 tech tickets per customer.

EDUCATION

UNIVERSITY OF LAGOS Lagos, NG
Bachelor of Science (B.Sc.) in Physics; Minor in Applied Physics (Electronics) Graduated Dec 2025
